In response to applicant's pre-amendment dated 11/10/05. the following action is taken:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 are, drawn to an optical apparatus having control information for a first and second disks, classified in class 369, subclass 53.22.
- II. Claims 17-24 are, drawn to an optical disk having an updated control information recorded thereon, classified in class 369, subclass 47.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions group one and group two are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group one has separate utility such as an optical disk, which does not require the use of updated control information. See MPEP § 806.05(d).
